

WRITING:
**LET'S KNOW
MORE ABOUT
NBA**

BACKGROUND

01

As our team loves to watch the NBA, we want to share how fun it is to watch the NBA, but before that we want to give you a background data to give you context through data before enjoying the NBA.

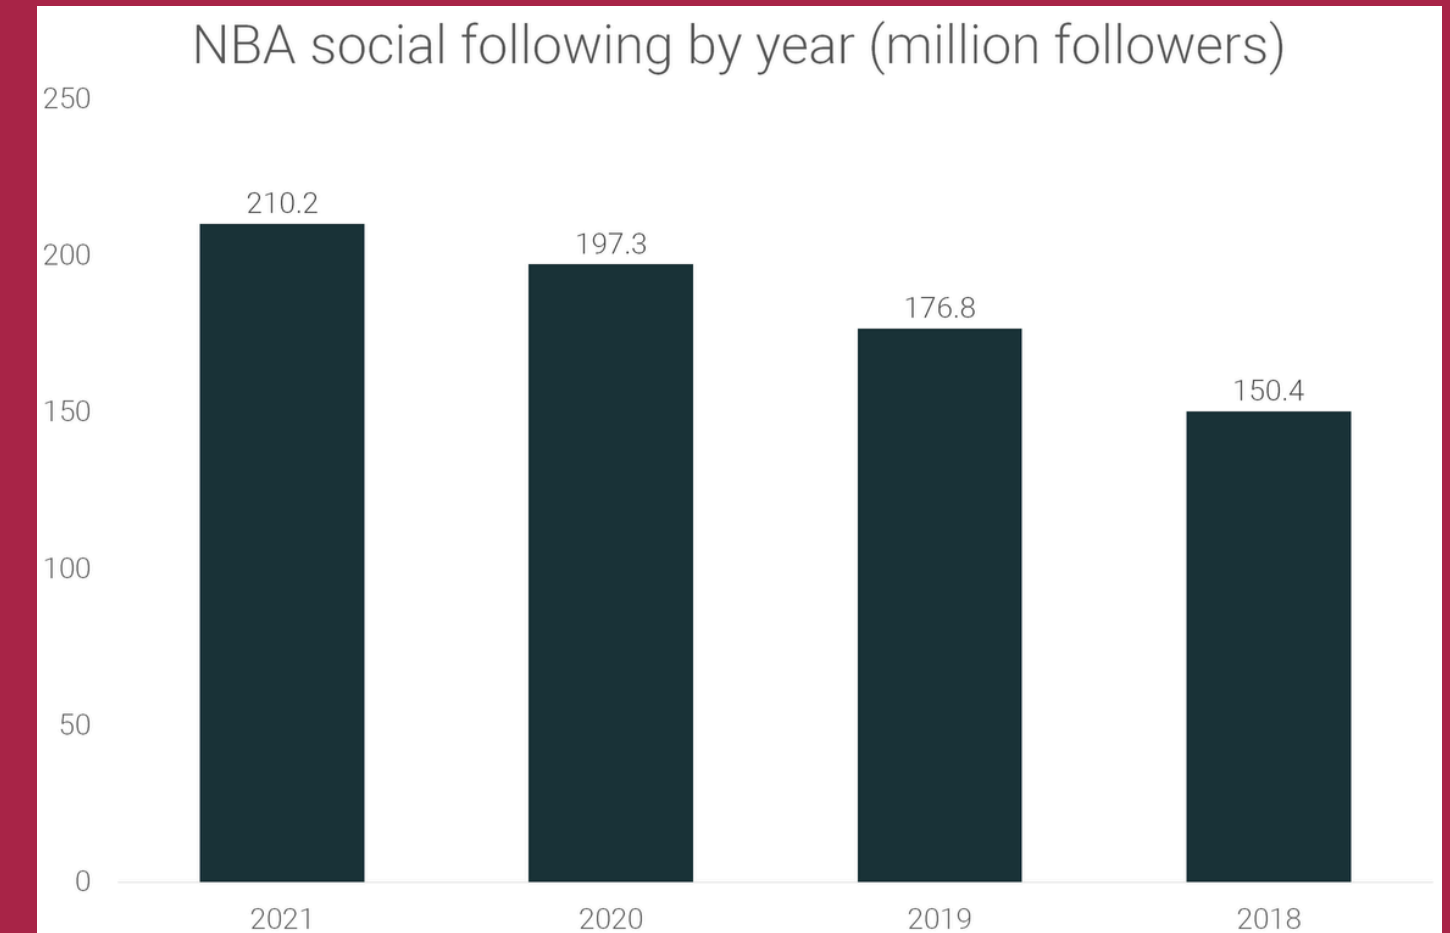

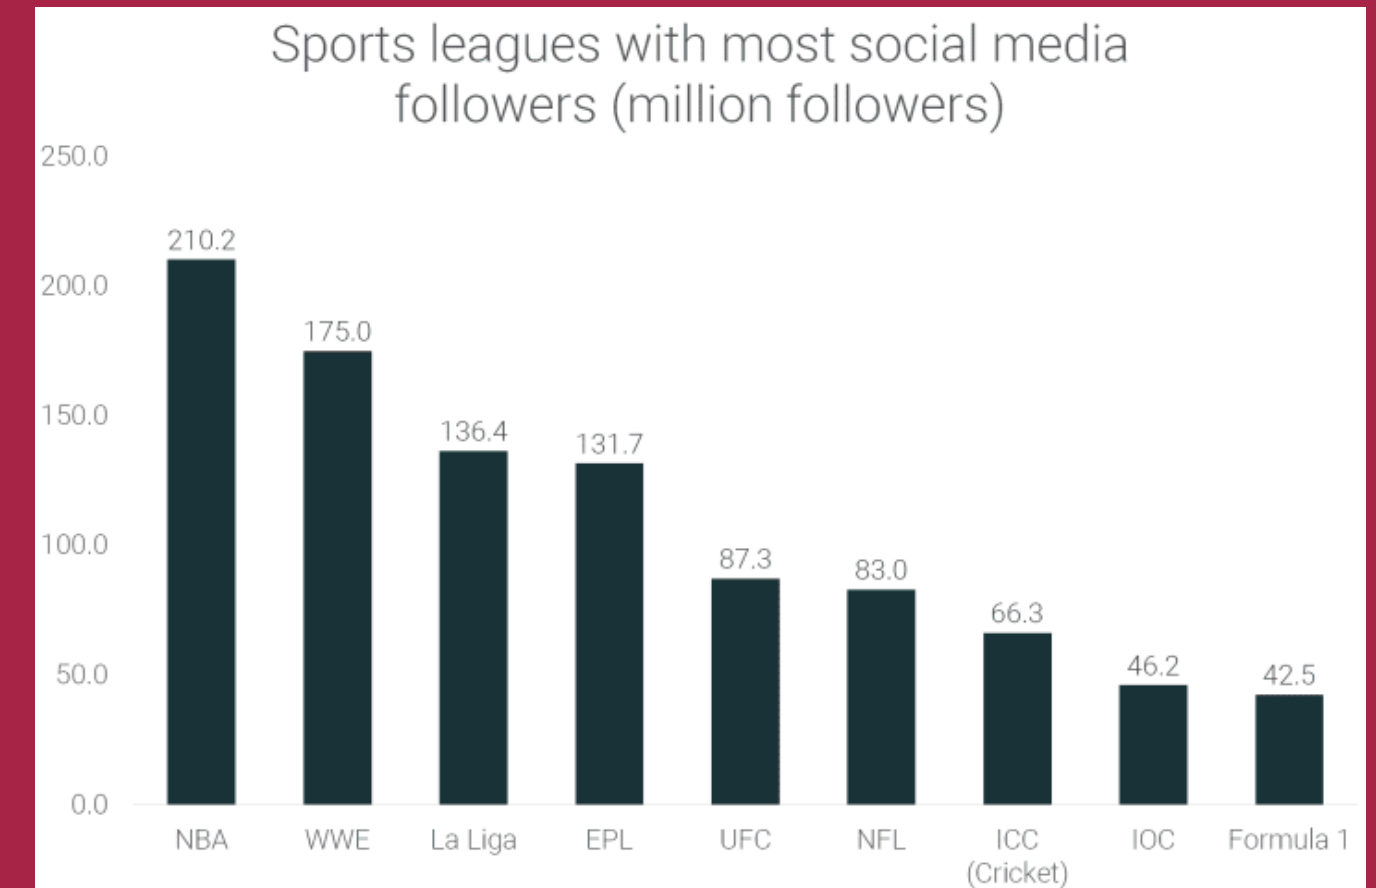

02

As NBA is increasing in popularity we want to show why it is so popular, why is it is interesting and has great story to tell.

BACKGROUND

As you can see that NBA has a high following in social media than any other sports league around the world. Moreover, it has a ever-so growing over the years. So, it is the right time to join the NBA seasons.

STEP 2: PURPOSE

ANALYZE NBA DATA FOR THE 2023-2024 SEASON

Analyze NBA data for the 2023-2024 season to set the stats for each team and make predictions based on the data analysis for at least two rounds of the playoffs. Finally, we want to see if the various metrics of players in the regular season will be significant in the playoffs.

HOW TO DO THE PROJECT

01

Team analysis

02

Players analysis

03

Team stratgy

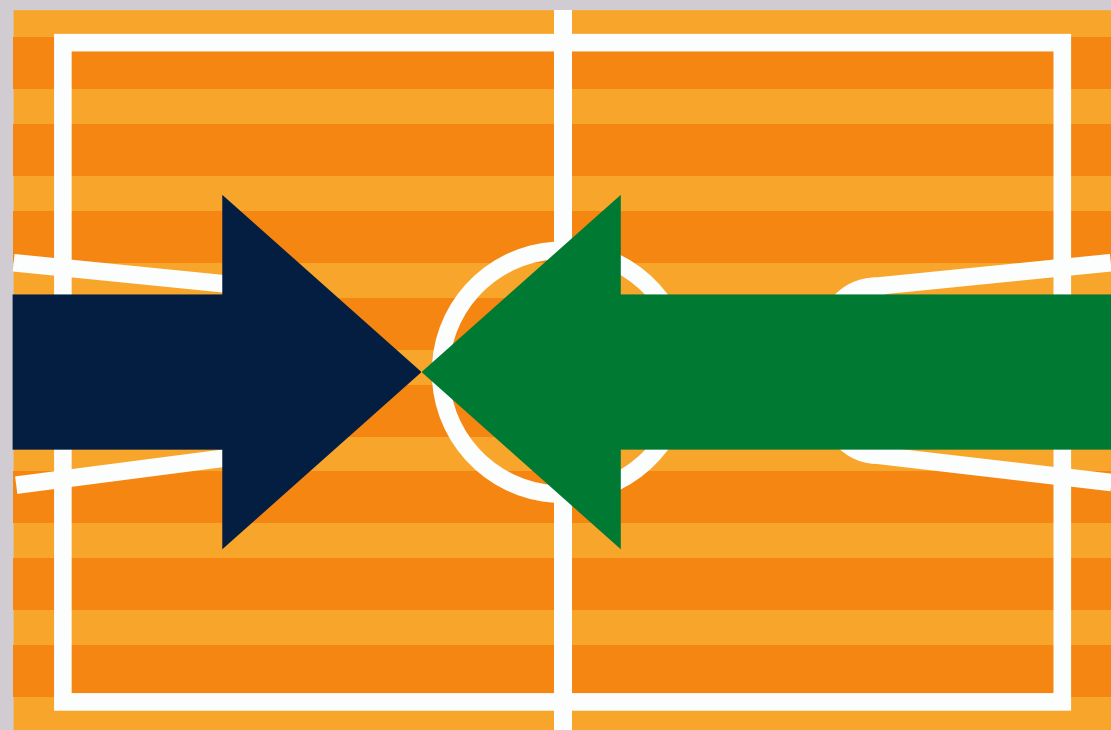

04

Predict play-off

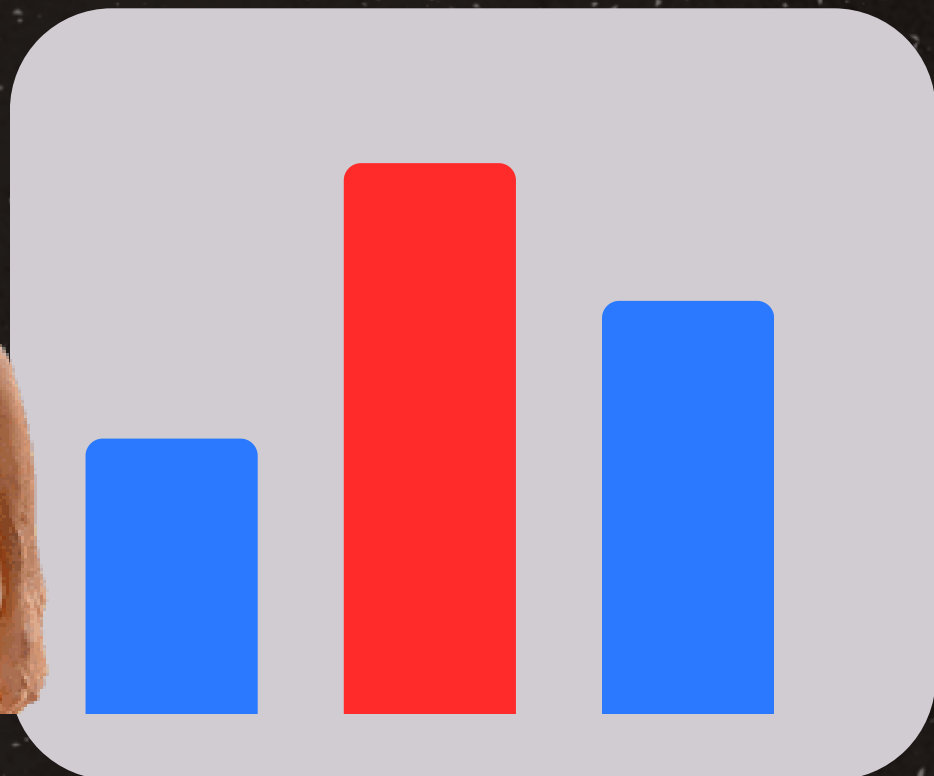

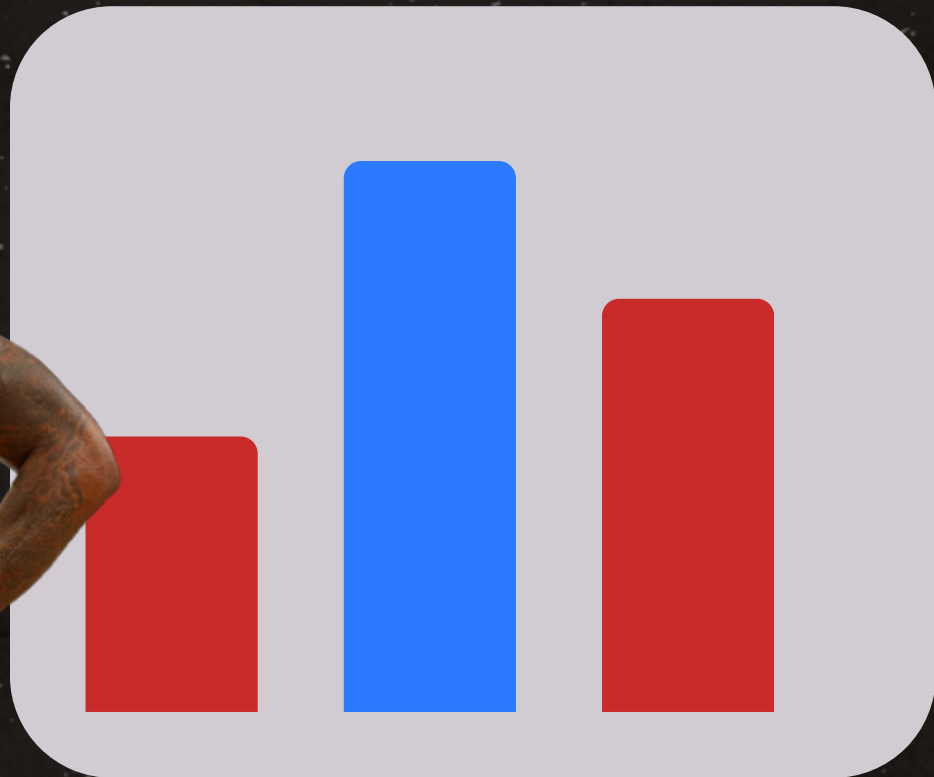

PG

TEAM ANALYSIS

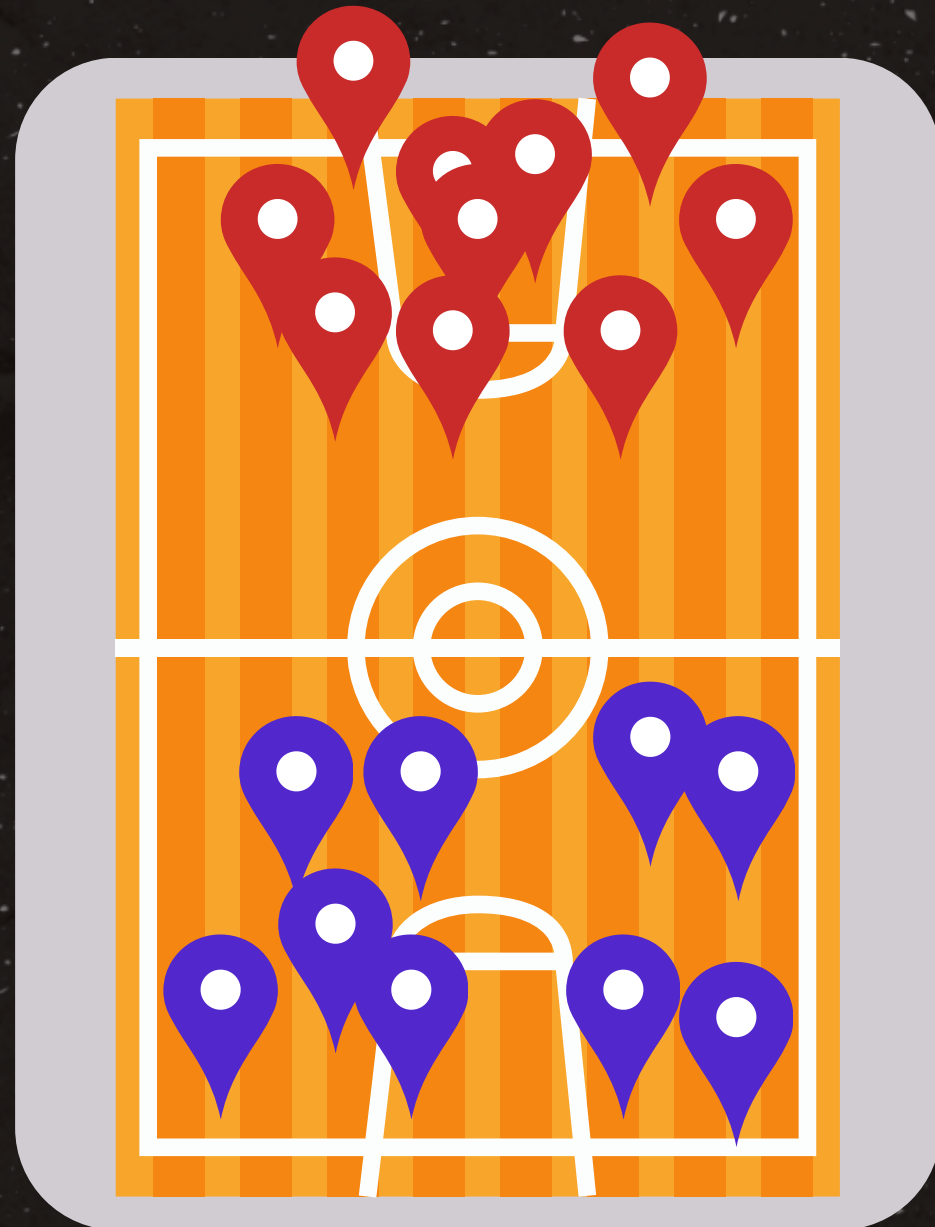

Analyze the eight teams that advanced to the second round of the playoffs.

Measure offensive and defensive metrics, such as possession, shots, and blocks, for each player within the team, as well as offensive and defensive metrics for each player, separating starters from substitutes.

PLAYERS ANALYSIS

Compare the data for each team's starting players, and compare their opponents. The overall performance of the team is measured by comparing the winning percentage, home and away winning percentage, etc.

TEAM STRATEGY

Compare tactics within teams.
Visualize the basketball court to see
where teams take the most shots, the
number of turnovers, and the most
common starting lineup combinations.

PREDICT PLAY-OFF

Predict the outcome of each game, starting with the second round of the playoffs, based on the data above. Compare your predictions with the data from the actual game, such as the starting lineup, the score of each set, and the MVP of the match.
